Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the instant claims are drawn to a process for preparing 2,3-cis-substituted 2-aryl propenals by condensing an arylacetaldehyde with a nonenolizable aldol. The closest prior art of record, U.S. 4,920,232 and U.S. 5,098,917 teach such a process; however, the references fail to teach or fairly suggest the combination of the specific volume ratio of solvent to water, and ratio of 2-arylacetaldehyde to nonenolizable aldehyde required by the instant claims, which, as shown in the instant examples and comparative example 14 (closest prior art example), affords higher yields, and substantially higher stereoselectivity to the cis-compound.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sikarl A. Witherspoon whose telephone number is 571-272-0649. The examiner can normally be reached on M-F 8:30-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on 571-272-0602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
